

## PRODUCT DATASHEET

[www.high-accuracy.com](http://www.high-accuracy.com)

# Emerson™ Wireless 1410D Gateway with 781 Field Link

- Gateway connects the *WirelessHART*® self-organizing networks with any host system
- Easy configuration and management of self-organizing networks
- Easy integration into control systems and data applications through serial and EtherNet connections
- Seamless integration into AMS Device Manager
- Greater than 99 percent data reliability with industry proven security
- Wireless capabilities extend the full benefits of Plantweb™ architecture to previously inaccessible locations

# Emerson Wireless Solution

## IEC 62591 (WirelessHART)... the industry standard

### Self-organizing, adaptive mesh routing

- No wireless expertise required, network automatically finds the best communication paths
- The self-organizing, self-healing network manages multiple communication paths for any given device. If an obstruction is introduced into the network, data will continue to flow because the device already has other established paths. The network will then lay in more communication paths as needed for that device

### Reliable wireless architecture

- Standard IEEE 802.15.4 radios
- 2.4 GHz ISM band sliced into 15 radio-channels
- Time Synchronized Channel Hopping to avoid interference from other radios, Wi-Fi®, and EMC sources and increase reliability
- Direct sequence spread spectrum (DSSS) technology delivers high reliability in challenging radio environment

## Emerson Wireless

### Seamless integration via LAN to all existing host systems

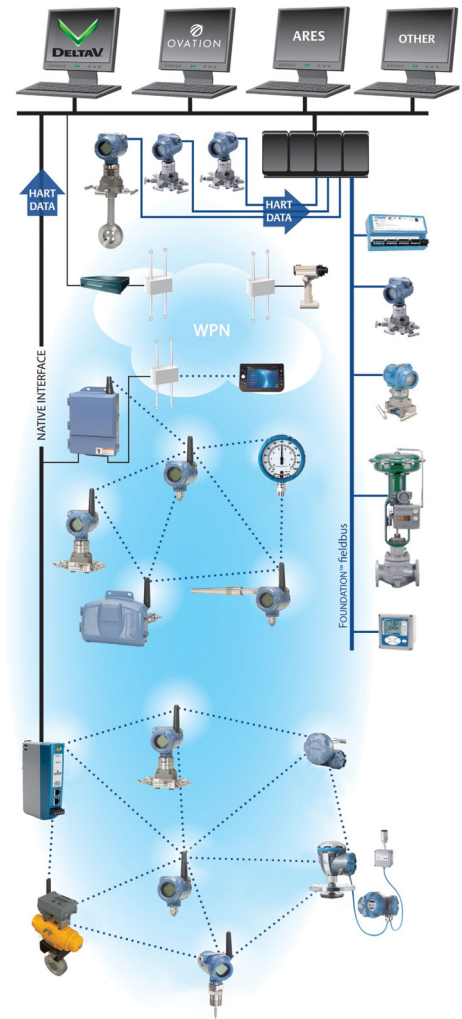

- Native integration into Ovation™ is transparent and seamless
- Gateways interface with existing host systems via LAN using industry standard protocols including OPC, Modbus® TCP/IP, and Modbus RTU

### Layered security keeps your network safe

- All wireless data is encrypted so your data is kept safe
- All wireless devices are authenticated so you know exactly what is on your network
- Third party security certifications including Achilles and FIPS-197 certification demonstrate Emerson's commitment to security
- Complete control of your network using the Gateway secure web interface

### SmartPower™ solutions

- Optimized Emerson instrumentation, both hardware and software, to extend power module life
- SmartPower technologies enable predictable power life

# Emerson Wireless 1410D Gateway and 781 Field Link

## Gain real-time process information with greater than 99 percent wireless data reliability

- The Emerson Wireless 1410D Gateway with 781 Field Link automatically manages wireless communications in constantly changing environments
- Native integration with DeltaV™ and Ovation automation systems provides simple and fast commissioning for wireless field networks
- Connect to data historians, legacy host systems, and other applications through EtherNet, Modbus TCP, Modbus RTU, OPC, EtherNet/IP™, and HART® outputs

## Guarantee system availability with redundant Wireless Gateways

- Never lose the wireless network with hot standby capability and automatic fault detection
- Wireless Gateways function as a single system, eliminating the need for duplicate host integration
- One-click configuration and plug-and-play architecture

## Complete wireless network configuration tools provided with each Gateway

- The integrated web interface allows easy configuration of the wireless network and data integration without the need to install additional software
- Complimentary AMS Wireless Configurator software provides Emerson Device Dashboards to configure devices and view diagnostic data
- Drag and drop device provisioning enables a secure method to add new wireless devices to the wireless field network

# Emerson Wireless 1410D Gateway

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [page 8](#) for more information on material selection

**Table 1. Emerson Wireless 1410D Gateway Ordering Information**

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Model	Product description	
1410	Wireless Gateway, 2.4 GHz DSSS, <i>WirelessHART</i> , Webserver, AMS Ready, HART-IP™	★

Redundancy options <sup>(10)(11)</sup>		
RD	Gateway redundancy	★

1. Must order the Emerson Wireless 781 Remote Field Link. Reference [Emerson Wireless 781 Field Link on page 6](#) for details.
2. Single active 10/100 baseT Ethernet port with RJ45 connector.
3. Additional ports disabled.
4. Dual active 10/100 baseT Ethernet ports with RJ45 connectors.
5. Multiple active ports have separate IP addresses, firewall isolation, and no packet forwarding.
6. Selection of Dual Ethernet option code 2 is recommended.
7. Convertible to RS232 via adapter, not included with Gateway.
8. Includes Modbus TCP and OPC.
9. Requires (A) Modbus RTU via RS-485 Communication protocol.
10. Requires the selection of Dual Ethernet option code 2.
11. Not available with Ethernet/IP option codes D3, D5, and D6.

Serial Port HART Modem and cables only	03095-5105-0001
USB Port HART Modem and cables only	03095-5105-0002

# Specifications

## Emerson Wireless 1410D Gateway

### Functional specifications

#### Input voltage

10.5 to 30 Vdc

#### Note

For best results, use a high quality industrial galvanically isolated power supply.

#### Current draw

Operating current draw is based on 3.6 W power consumption.

At startup, the power supply must be capable of momentarily sourcing at least twice the operating current indicated in the figure below. The Gateway may draw significantly more current momentarily at startup if not limited by the power supply.

#### Note

For recommended intrinsic safety barrier installation:

- Input voltage 20 to 30 Vdc is needed
- Current draw is based on 6.6 W power consumption of Gateway and barriers combined

### Environmental

Operating temperature range:  
-40 to 167 °F (-40 to 75 °C)

Operating humidity range:  
0 to 100% relative humidity

### Electromagnetic Compatibility (EMC) performance

Meets all industrial environment requirements of EN61326 and NAMUR NE-21. Maximum deviation <1% span during EMC disturbance<sup>(1)</sup>.

1. During surge event, device may exceed maximum EMC deviation limit or reset; however, device will self-recover and return to normal operation within specified start-up time.

### Antenna options

See “Emerson Wireless 781 Field Link” on page -9.

### Physical specifications

#### Material selection

Emerson provides a variety of Rosemount™ product with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser's sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options and components for the particular application. Emerson is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

#### Weight

0.70 lb (0.318 kg)

#### Material of construction

##### Housing

Polycarbonate

##### Rail mount

Top hat rail EN 50022  
(35 x 7.5 mm and 35 x 15 mm)

### Communication specifications

#### Isolated RS-485

2-wire communication link for Modbus RTU multidrop connections

Baud rate: 57600, 38400, 19200, or 9600

Protocol: Modbus RTU

Wiring: Single twisted shielded pair, 18 AWG

Wiring distance: approximately 4000 ft. (1,524 m)

#### EtherNet

Ethernet Ports 1 and 2 are independent interfaces with unique MAC addresses, no routing or switching capabilities

10/100base-TX Ethernet communication port

Protocols: Modbus TCP, OPC, EtherNet/IP, HART-IP, https  
(for Web Interface)

Wiring: Cat5E shielded cable

Wiring distance: 328 ft. (100 m)

**Modbus**

Supports Modbus RTU and Modbus TCP with 32-bit floating point values, integers, and scaled integers.

Modbus Registers are user-specified.

**OPC**

OPC server supports OPC DA v2, v3

**EtherNet/IP**

Supports EtherNet/IP protocol with 32-bit Floating Point values and Integers

EtherNet/IP Assembly Input-Output instances are user configurable.

EtherNet/IP specifications are managed and distributed by ODVA.

For details on capabilities, see the Emerson Wireless [Manual Supplement](#).

**Self-organizing network specifications****Protocol**

IEC 62591 (*WirelessHART*), 2.4 to 2.5 GHz DSSS

**Maximum network size**

- 100 wireless devices at 8 seconds or more
- 50 wireless devices at 4 seconds
- 25 wireless devices at 2 seconds
- 12 wireless devices at 1 second

For information on network size and update rate, see the capacity estimator tool on the Emerson Wireless [homepage](#).

**Supported device update rates**

1, 2, 4, 8, 16, 32 seconds or 1 to 60 minutes

**Network size/latency**

100 Devices: less than 10 seconds

50 Devices: less than 5 seconds

**Data reliability**

> 99 percent

**System security specifications****EtherNet**

Secure Sockets Layer (SSL) enabled (default) TCP/IP communications.

**Emerson Wireless Gateway access**

Role-Based Access Control (RBAC) including Administrator, Maintenance, Operator, and Executive. Administrator has complete control of the Gateway and connections to host systems and the self-organizing network.

**Self-organizing network**

AES-128 Encrypted *WirelessHART*, including individual session keys. Drag and drop device provisioning, including unique join keys and white listing.

**Internal firewall**

User configurable TCP ports for communications protocols, including Enable/Disable and user specified port numbers. Inspects both incoming and outgoing packets.

**Third party certification**

Wurldtech: Achilles Level 1 certified for network resiliency

National Institute of Standards and Technology (NIST): Advanced Encryption Standard (AES) Algorithm conforming to Federal Information Processing Standard Publication 197 (FIPS-197).

**Emerson Wireless 781 Field Link****Functional specifications****Wireless output**

IEC 62591 (*WirelessHART*), 2.4 GHz DSSS

**Local display**

The optional five-digit integral LCD display can display wireless information.

**Environmental**

0 to 99 percent non-condensing relative humidity

**Radio frequency power output from antenna**

External antenna (WK1 option):  
Maximum of 10 mW (10 dBm) EIRP

**Field link wiring distance**

Wiring distance between Field Link and Gateway:  
up to 200 m using single twisted shielded pair, 18 AWG

**Barrier Recommendations**

For use in a hazardous area the recommended intrinsic safety barriers are

Signal Barrier:

- GM-International D1016S
- Stahl 9176 10-16-00

## Physical specifications

### Material selection

Emerson provides a variety of Rosemount product with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser's sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options and components for the particular application.

Emerson is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

### Materials of construction

#### Enclosure

Housing: Low-copper aluminum or stainless steel

Paint: Polyurethane

Cover O-ring: Buna-N

#### Terminal block and power module

PBT

#### Antenna

PBT/Polycarbonate (PC) integrated omni-directional antenna

#### Mounting

Mounting brackets also permit remote mounting.

See [Figure 3 on page 16](#).

#### Weight

##### Low-copper aluminum

Emerson Wireless 781 without LCD display - 4.1 lb (1.9 kg)

Emerson Wireless 781 with M5 LCD display - 4.2 lb (2.0 kg)

##### Stainless steel

Emerson Wireless 781 without LCD display - 8.0 lb (3.5 kg)

Emerson Wireless 781 with M5 LCD display - 8.1 lb (3.6 kg)

#### Enclosure ratings (781)

Housing style option codes D and E are Type 4X and IP66/67 rated dual-compartment housings

## Performance specifications

### EMC performance

Meet all industrial environment requirements of EN61326 and NAMUR NE-21. Maximum deviation <1% span during EMC disturbance.<sup>(1)</sup>

### Vibration effect

No effect when tested per the requirements of IEC60770-1 (1999):

High vibration level - field or pipeline (10 to 60 Hz 0.21 mm displacement peak amplitude/60 to 2000 Hz 3g).

---

1. During surge event, device may exceed maximum EMC deviation limit or reset; however, device will self-recover and return to normal operation within specified start-up time.

## Product certifications

### Emerson Wireless 1410 Gateway

Rev 2.0

#### European Directive Information

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EUC Declaration of Conformity can be found at [Emerson.com/Rosemount](http://Emerson.com/Rosemount).

#### Telecommunication Compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification.

Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

#### FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

#### Ordinary Location Certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

#### Installing Equipment in North America

The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

#### USA

- N5** USA Division 2  
 Certificate: 30349590 (FM)  
 Standards: FM Class 3600 – 2011,  
               FM Class 3611 – 2004,  
               FM Class 3616 – 2011,  
               FM Class 3810 – 2005  
 Markings: NI CL 1, DIV 2, GP A, B, C, D T4;  
               Suitable for use in CL II, III, DIV 2, GP F, G T4;  
               T4(–40 °C ≤ T<sub>a</sub> ≤ 60 °C)

#### Special Condition for Safe Use:

1. When installed as Division 2 equipment, the Emerson Wireless 1410 Gateway shall be mounted within a tool-secured enclosure which meets the requirements of ANSI/ISA 61010-1 and be capable of accepting the applicable wiring methods per the NEC.

#### Canada

- N6** Canada Division 2  
 Certificate: 2646342 (CSA)  
 Standards: CAN/CSA C22.2 No. 0-10,  
               CSA C22.2 No. 213-M1987 (R2013),  
               CSA C22.2 No. 61010-1 – 2012,  
               ANSI/ISA-12.12.01 – 2012, UL61010-1,  
               3<sup>rd</sup> Edition  
 Markings: Suitable for CL I, DIV 2, GP A, B, C, D.  
 Temperature code: T4 (–40 °C ≤ T<sub>a</sub> ≤ 70 °C)

#### Note

- Shall be powered by a Class 2 power supply.
- Suitable for dry indoor locations only.
- Equipment must be installed in a suitable tool accessible enclosure subject to the end use application.
- Using the Emerson Wireless 1410D and the Wireless Field Link 781 in a hazardous location requires barriers between the two units in some cases.

#### Europe

- N1** ATEX Type n  
 Certificate: Baseefa14ATEX0125X  
 Standards: EN 60079-0: 2012, EN 60079-15: 2010  
 Markings: Ⓔ II 3 G Ex nA IIC T4 Gc, T4 (–40 °C ≤ T<sub>a</sub> ≤ 75 °C)  
               , V<sub>max</sub> = 30 Vdc

#### Special Conditions for Safe Use:

1. The equipment must be installed in an area of not more than Pollution Degree 2 as defined in IEC 60664-1, and in an enclosure that provides a degree of protection of at least IP54 and meets the relevant requirements of EN 60079-0 and EN 60079-15.
2. External connections to the equipment must not be inserted or removed unless either the area in which the equipment is installed is known to be non-hazardous, or the circuits connected have been de-energised.

3. The equipment is not capable of withstanding the 500 V electrical strength test as defined in clause 6.5.1 of EN 60079-15: 2010. This must be taken into account during installation.
4. When fitted, the surface resistivity of the remote antenna is greater than 1 GΩ. To avoid electrostatic charge build up, it must not be rubbed with a dry cloth or cleaned with solvents.

## International

### N7 IECEx Type n

Certificate: IECEx BAS 14.0067X

Standards: IEC 60079-0: 2011, IEC 60079-15: 2010

Markings: Ex nA IIC T4 Gc, T4(-40 °C ≤ T<sub>a</sub> ≤ 75 °C),

V<sub>max</sub> = 30 Vdc

### *Special Conditions for Safe Use (X):*

1. The equipment must be installed in an area of not more than Pollution Degree 2 as defined in IEC 60664-1, and in an enclosure that provides a degree of protection of at least IP54 and meets the relevant requirements of EN 60079-0 and EN 60079-15.
2. External connections to the equipment must not be inserted or removed unless either the area in which the equipment is installed is known to be nonhazardous, or the circuits connected have been de-energised.
3. The equipment is not capable of withstanding the 500 V electrical strength test as defined in clause 6.5.1 of EN 60059-15: 2010. This must be taken into account during installation.
4. When fitted, the surface resistivity of the remote antenna is greater than 1 GΩ. To avoid electrostatic charge build-up, it must not be rubbed with a dry cloth or cleaned with solvents.

$P_i = 1\text{ W}$	$P_i = 1\text{ W}$	$P_o = 1\text{ W}$
$C_i = 0\text{ }\mu\text{F}$	$C_i = 5.1\text{ nF}$	$C_o = 13.9\text{ }\mu\text{F}$
$L_i = 0\text{ mH}$	$L_i = 0\text{ mH}$	$L_o = 1000\text{ }\mu\text{H}$

### Special Conditions for Safe Use (X):

1. The plastic antenna may present a potential electrostatic ignition hazard and must not be rubbed or cleaned with a dry cloth.
2. The Emerson Wireless 781 enclosure is made of aluminum alloy and given a protective paint finish; however, care should be taken to protect it from impact or abrasion if located in a zone 0 environment.
3. The apparatus is not capable of withstanding the 500 V isolation test required by EN 60079-11. This must be taken into account when installing the apparatus.

P <sub>i</sub> = 1 W	P <sub>i</sub> = 1 W	P <sub>o</sub> = 1 W
C <sub>i</sub> = 0 μF	C <sub>i</sub> = 5.1 nF	C <sub>o</sub> = 13.9 μF
L <sub>i</sub> = 0 mH	L <sub>i</sub> = 0 mH	L <sub>o</sub> = 1000 μH

**Special Conditions for Safe Use (X):**

1. The plastic antenna may present a potential electrostatic ignition hazard and must not be rubbed or cleaned with a dry cloth.
2. The Emerson Wireless 781 enclosure is made of aluminum alloy and given a protective paint finish; however, care should be taken to protect it from impact or abrasion if located in a zone 0 environment.
3. The apparatus is not capable of withstanding the 500 V isolation test required by EN 60079-11. This must be taken into account when installing the apparatus.

**China**

- I3** China Intrinsic Safety  
 Certificate: GYJ13.1444X  
 Standards: GB3836.1-2010,  
 GB3836.4-2010,  
 GB3836.20-2010  
 Markings: Ex ia IIC T4 Ga, -40 ~ +70 °C

**Special Condition for Safe Use (X):**

1. See certificate for special conditions.

**EAC - Belarus, Kazakhstan, Russia**

- IM** Technical Regulation Customs Union (EAC) Intrinsic Safety  
 Certificate: RU C-US.Gb05.B.00643  
 Markings: 0Ex ia IIC T4 Ga X

Input parameters (power terminals)	Input parameters	Output parameters
	RS485	
U <sub>i</sub> = 30 B	U <sub>i</sub> = 11 B	U <sub>o</sub> = 7.14 B
I <sub>i</sub> = 200 mA	I <sub>i</sub> = 300 mA	I <sub>o</sub> = 112 mA
P <sub>i</sub> = 1 B <sub>T</sub>	P <sub>i</sub> = 1 B <sub>T</sub>	P <sub>o</sub> = 1 B <sub>T</sub>
C <sub>i</sub> = 0 мкФ	C <sub>i</sub> = 5.1 нФ	C <sub>o</sub> = 13.9 мкФ
L <sub>i</sub> = 0 мГ <sub>H</sub>	L <sub>i</sub> = 0 мГ <sub>H</sub>	L <sub>o</sub> = 0 мГ <sub>H</sub>

**Special Condition for Safe Use (X):**

1. See certificate for special conditions.

**Combinations**

**KD** Combination of I1, I5, and I6

**KL** Combination of I1, I5, I6, and I7

## Dimensional drawings

**Figure 1. Emerson Wireless 1410D Gateway**

Dimensions are in inches (millimeters).

**Note**

Allow extra space in front of unit for wiring, antenna connector and antenna cable service loop.

**Figure 2. Emerson Wireless 1410D Gateway with 781 Field Link**

A. Cable not provided

B. Connectors

Dimensions are in inches (millimeters)

**Figure 3. Transmitter Mounting Configurations with Optional Mounting Bracket**

A. 2-in. U-bolt for pipe mounting

Dimensions are in inches (millimeters).
